a pharmaceutically-acceptable carrier, wherein the preparation is formulated as a unit dosage containing the conjugate in an amount effective for activating the immune response of a mammal when administered to an apical surface of an epithelial barrier of the mammal, and wherein the pharmaceutical preparation is an oral formulation, an aerosol formulation or a nasal formulation.

Remarks

Applicants have amended the claims to more particularly and distinctly claim the invention. This is not a narrowing amendment. Instead, the amendment is simply meant to clarify what applicants have meant all along. No new matter has been added.

Respectfully submitted,

Bv.
